

## Installing Stainless Steel End Caps & Flush Angles

---

### Overview<sup>1</sup>

Below are instructions for proper installation of a Stainless Steel End Cap into a post. These instructions apply for Inline Design's stainless steel cable railing systems, glass systems and bar holder systems, and wall mounted tube handrail system.

**Caution:** Wear protective ANSI approved safety glasses, working gloves and breathing mask all the times.

---

### Tools Required

- 1) JB Weld Glue (found at a local hardware store)
  - 2) Cloth or styrofoam bag
  - 3) Weighted rubber hammer
- 

### Installation Instructions

- 1) Apply JB Weld glue to the inside of the post

---

<sup>1</sup> This document includes hyperlinks and is intended to be viewed as a PDF file rather than print material

- 2) Position the end cap on top of the post. Cover the end cap with a piece of cloth or styrofoam bag to protect it from any scratches. Then, tap the end cap in using a rubber mallet.

---

NOTE: A small amount of surface corrosion is not uncommon after a some exposure to weather or salty conditions. We recommend using our [passivation solution](#) or some sort of stainless polish to keep any surface corrosion from happening; more information available [on our Engineering Specs Page](#)
