

## Installing Stainless Steel Square Handrail Bracket Adjustable \*

Visit our website for more information: <http://inlinedesign.us>

- 1) Screw in the stem into the threaded end cap
- 2) Position the end cad on top of the post then mark the tube and the end cap as shown in the below picture

- 3) Spread JBweld (found at a Home Depot store) glue to the inside of the tube
- 4) Unscrew the top stem from the end cap
- 5) Reposition the square threaded end cap back on the post with the same previous marks and direction
- 6) Using a mallet tap the end cap in. You may want to use a Styrofoam bag to protect the end cap from being scratched by the mallet when tapping it in
